

MADE IN **BRITAIN**

Here at Acrylic Design UK Ltd we are proud to announce that we manufacture over 90% of our products in the UK. We are supporting the “**Made in Britain**” campaign by developing and producing our UK made products in our Watford based factory. All of the products which qualify as “**Made in Britain**” will be identified by a Union jack flag on the related product pages.

Our goal is to create cost effective solutions, keeping production of Point of Sale and Acrylic components based in Britain, sourcing only where necessary components from abroad to help deliver a competitive pricing structure.

Acrylic Design UK Ltd is proud to be celebrating 40 years of being the market leader within the industry. We recognise and believe that the “**Made in Britain**” campaign is the way to encourage customer satisfaction through pricing and quality of service. By purchasing our products you as our customer will be helping us to achieve our aims and in doing so you will also supporting the UK economy.
